Exploring Palmer Penguins Dataset

Nabeel Soomro

Exploring the Palmer Penguins dataset

Objectives:

- 1. Is there a correlation between flipper length and body mass?
- 2. Which penguin species is the largest?
- 3. Does sex affect body mass?

Environment Setup Loading the following pacakges

- tidyverse
- ggplot2
- palmerpenguins
- gridExtra

```
library(tidyverse)
library(ggplot2)
library(palmerpenguins)
library(gridExtra)
```

The Penguins Dataset:-

```
## # A tibble: 6 x 8
                      bill_length_mm bill_depth_mm flipper_length_mm body_mass_g

                                                                  190
                                                                             3650
## # i 2 more variables: sex <fct>, year <int>
```

Objective 1:

Finding if there is a correlation between mass & flipper length.

Postive correlation between the two variables. as one variable changes, so does the other!

Objective 2

Finding out which species of penguins is the heaviest.

Mean mass by species Gentoo is the largest species in terms of average mass

Objective 3

Does sex play a role on weight?

Mass difference between males & females Males tend to have more mass than females
